Kearny Municipal Utilities Authority, Town of Kearny
Bergen Avenue Pump Station Upgrades
State Project No. S340259-16

In accordance with procedures established to evaluate projects which have applied for assistance under the New Jersey Wastewater Treatment Financing Program, a Level 1 environmental review has been conducted on the proposed project which will involve the upgrades of the existing Bergen Avenue Pump Station to accommodate additional flow in an effort of the Town of Kearny addressing recurring sanitary sewer emergencies in the Sandford Avenue District. The flow from this district will be diverted to the Bergen Avenue Pump Station, which requires capacity and resiliency upgrades—including new pumps, standby power, and control system improvements—to accommodate the increased flow up to a station firm capacity of 500 gallons per minute (gpm).

The New Jersey Department of Environmental Protection has made a preliminary decision to assist this project under the financing program. The Kearny Municipal Utilities Authority (KMUA) will finance 100 percent of the project costs.

Proposed Project Cost: $4,509,745.55

Proposed Loan (Kearny Municipal Utilities Authority): $4,509,745.55

Upon written request, the planning documents and the Department's Environmental Decision Document will be available for public review at 39 Central Avenue, Kearny, NJ 07032.
